### DETAILED ACTION

1. Applicant's election with traverse of electing compound 4 in the reply filed on 11/6/09 is acknowledged. The traversal is on the ground that the new class of dyes which are useful for the mesogenic mixture. This is not found persuasive because the species of the formula IIIa and IIIb are patent distinct. The chemical compounds in the present claims have different structure.

The requirement is still deemed proper and is therefore made FINAL.

2. The elected species reads on claims 1, 4-7, 9-19 and 25-30. Therefore, the claims 8, 20-24 and 31-54 are withdrawn from the consideration as non-elected species.

### *Claim Rejections - 35 USC § 112*

3. Claims 1, 4-7, 9-19 and 25-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the proviso for A is not clearly defined because the  $q^{1-4}$  can be 0. If each of q is 0 then  $Ar^{1-4}$  does not mean anything. If applicants intend to claim the compounds of formula I with at least one naphthalene derivative then the claim should be clearly defined.

In claims 29-30, the definition for the sum of  $q^{1-4}$  is incorrect. Also, the variables  $P^1$ , D's, Z's and m's are not clearly defined because some of the variables are not part of the formula I.

The claims 4-7, 9-19 and 25-28 are rejected because they are dependent claims.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 4-7, 9-15 and 25-30 are rejected under 35 U.S.C. 102(b) as being anticipated by CAPLUS 1993: 672175.

The reference discloses a polymerizable compound represented by the following structure

, which anticipates the claimed formula I with A being formula IIIa ( $q^{1-4}=0$ ).

***Response to Arguments***

6. Applicant's arguments, see remarks, filed 6/9/09, with respect to the rejections in the previous Office Action mailed 3/9/09 have been fully considered and are persuasive in light of the newly amended claim. Therefore, the rejections have been withdrawn. However, upon further consideration, new grounds of rejection are made in view of the sections 3 and 5 cited above.

7. The elected compound 4 is allowed.
